TABLE OF CONTENTS

- BACKGROUND
- IT MANAGEMENT
- ICT GOVERNANCE
- SUSTAINABLE TECHNOLOGY FOR SERVICE DELIVERY
- DPSA FRAMEWORK – MCGICT

BACKGROUND

- IT Management: link bwt business objectives and IT priorities.
- The architecture of the ITIL Core is based on a Service Lifecycle
- Service strategy: process is concerned with the development of service concepts in preparation for the selection of services to be provided.
- Service design: is about the design of services and all supporting elements for introduction into the live environment.
- Service transition: is to build and deploy IT services by also making sure that changes to services and Service Management processes are carried out in a coordinated way.
- Service operations: includes fulfilling user requests, resolving service failures, fixing problems, as well as carrying out routine operational tasks.
- Continual service improvement: offers a mechanism for the IT organization to measure and improve service levels, the technology, efficiency and effectiveness of processes used in the overall management of services

IT MANAGEMENT TRENDS

CIGFARO

KEY IT MANAGEMENT TRENDS

- Improve the quality and efficiency of IT Services.
- Compliance with business requirements.
- Business-IT Fusion: business & IT working together to achieve common goals.
- End user experience: helps businesses decide on how to better utilize IT to achieve their goals.
- Omni-channel IT support: improving end-user experience, gives consumers a list of channels, and lets them choose
- BYOD trend: greater support and security issues crop up.
- Shadow IT and IT as a Service: easy availability of cloud solutions.
- Big Data and Analytics: data is a strategic asset
- Knowledge Management: helps in delivering efficient support outcomes.

IT GOVERNANCE

ICT GOVERNANCE

- The concept of IT Governance as an umbrella framework encompassing a wide spectrum of arrangements, including the measurement of benefits, has yet to emerge.
- IT Governance is still very much associated with full filling control or compliance requirements.
- IT Governance is driven by Top Management.
- The benefits of implementing IT Governance are not measured and are difficult to quantify

(PWC IT Governance Institute – 2017)

ICT GOVERNANCE & MANAGEMENT

Governance ensures that enterprise objectives are achieved by **evaluating** stakeholder needs, conditions and options; setting **direction** through prioritisation and decision making; and **monitoring** performance, compliance and progress against agreed-on direction and objectives (**EDM**).

Management plans, builds, runs and monitors activities in alignment with the direction set by the governance body to achieve the enterprise objectives (**PBRM**).

SUSTAINABLE TECHNOLOGY

SUSTAINABLE TECHNOLOGY

With the promise of the “hyperconnected future”, technology evangelists estimates that by 2020 there will be 50 billion connected devices..

IoT is likened to a force of nature that can propel those that can plan ahead or devastate those that ignore its potency.

- The rapid adoption of IoT with unprecedented bandwidth.
- Computational power in instrumentation devices.
- Ground breaking service delivery in real-time.
- Emerging service, modern type of IoT services to improve quality of service.
- Reduction of complexities using methods, Big Data, Cloud and AI.
- Emerging IoT services: ordering products, logistics, education, healthcare, industrial IoT and smart cities.

DPSA FRAMEWORK
