## **Johan van Niekerk**

Dr . Johan van Niekerk is an ornithologist specialising in the study of the activity patterns (including circadian rhythms), behaviour and ecology of birds. Since 2002 he developed a keen interest in the birds of Lesotho and envisioned an intensive study on them; preliminary fieldwork for this study is well underway. Johan funds his research through income generated as an independent environmental consultant, having successfully completed a number of risk assessment, bird monitoring and environmental impact assessment studies as an avifaunal specialist.
